Who We Are

Aircraft Demolition provides complete on-site demolition recycling services for retired and damaged aircraft as well as part-out salvage and disassembly services.

At Aircraft Demolition we provide an economical, convenient, and environmentally responsible method for the demolition and recycling of aircraft and engines.

Our crew has more than 20 years of hands on experience as licensed airframe and powerplant mechanics. Aircraft Demolition uses the latest equipment and technology available to capture as much of the recyclable material as possible - keeping it from area landfills.

Experience Matters

Tim Zemanovic has been a licensed airframe and powerplant mechanic for over 20 years with a focus on major structural repair. He has also served as a classroom instructor, training others on airframe and powerplant mechanics. Mr. Zemanovic has experience in the reclamation and recycling industry and has developed proprietary systems and equipment to reclaim as much of an aircraft recyclable material as possible.

Why Aircraft Demolition is the Best Choice for Retired or Damaged Aircraft and Engines

Aircraft Demolition specializes in the demolition and recycling of aircraft and engines for military, commercial airlines, insurance companies and leasing companies worldwide.

Our experienced demolition crews will deconstruct and recycle larger aircraft at most locations. By going “green” nearly 80% of all aircraft material is recycled, reducing the need for aircraft graveyards and the amount of material placed in permanent landfills.

“I just want to thank you for the excellent service Aircraft Demolition provided us with the recent demolition and recycle of a DC-9. Northwest Airlines is dedicated to protecting the environment, and that is why we are pleased to know that nearly 80% of the aircraft material was recycled, reducing the need for aircraft graveyards and the amount of material placed in permanent landfills”

Chad Sukhtipyarog
Manager Aircraft Finance
Transactions & Administration
Northwest Airlines, Inc.

How We Work Together

Let us come to you. We will send one of our experienced crews to conduct the demolition and recycling at your location of choice. Rather than flying the aircraft to us, we come to you.

Aircraft Demolition disassembles the entire aircraft including engines and performs all necessary precautions to prevent any environmental contamination.

All demolition and recycling is done with full compliance of all applicable laws, governmental regulations and ordinances, specifically Parts 21 and 43 as outlined in the Code of Federal Aviation Regulations.

Aircraft Demolition provides all necessary equipment and removes all materials. Most demolitions are completed within one day.

Finally, a thorough clean up of the deconstruction site is conducted. Following project completion, the data plate is returned to the owner/carrier.

Aircraft Demolition Advantages

- We eliminate any need to transport aircraft or engines
- Experienced in both airline and recycling industries
- More than 20 years of structural aircraft knowledge
- All projects are supervised by a licensed aircraft mechanic
- We service aircraft throughout the world
- No project too large or too small
- Your satisfaction is guaranteed

Various Aircraft Manufacturers We Recycle

- Airbus
- Boeing
- McDonald Douglas
- All Military Aviation

Various Engine Manufacturers We Recycle

- CFM
- General Electric
- Honeywell
- IAE
- Pratt & Whitney
- Rolls Royce
- Westinghouse

Proud member of the Aircraft Fleet Recycling Association (AFRA)
